Chapter 1. Core Services

Google Workspace Core Services are the heart of Google's educational free offering to schools. The Core Services are: AppSheet, Assignments, Calendar, Classroom, Cloud Search, Drive and Docs, Gmail, Google Chat, Google Meet, Google Vault, Groups for Business, Keep, Tasks.

Core Services within a Google for Education Workspace domain are important due to specific terms of services abiding by children protection laws. Core Services can be enabled or disabled by Organization Unit or Group.

Organizational Units

Organizational Units (OUs) are how you turn on or off a service for users.

best practice is

turning on a service

this is how you turn on a service

turn on or off a service

first go to the service. there are two kinds of services.

1. click on the OU
2. enable
3. click save

Chapter 2. Device Listing Page

The device listing page is where you can view all managed chromebooks and allows the admin to do lots of management tasks.

Remotely Wiping a Chromebook

Wiping a Chromebook

Google Admins can remotely wipe a Chromebook from within the admin console.

1. Go to: admin.google.com
2. Go to device listing page
3. Select a Chromebook and go into the device record
4. Click the wipe button

enrolling a chromebook

this is how you enroll a chromebook into your admin console

context goes here

1. open your chromebook
2. do the key combo
3. enter in the wifi
4. log in with this un/pwd
5. wait for a bit
6. make sure you reboot

Chapter 3. Device Settings

Device Settings apply to the managed Chromebook device, which are located in an Organizational Unit.

Device Settings can be configured on sets of devices in different situations to allow them to act different according to what is needed.
